PENTAX

PENTAX Accessories Programme of peripheral equipment for your endoscope

Greater degree of compatibility

Finely tuned system components are essential for safe and successful endoscopy. That is why we aim to provide the highest possible quality in every detail of the peripheral equipment for PENTAX endoscopes and endoscopy systems. The following pages describe a carefully compiled accessory programme for customising and installing additional equipment for your PENTAX endoscopy system.

How to choose the correct accessories:

Before you decide on new accessories, we recommend that you read the following three-point checklist. Our PENTAX specialists will be pleased to advise you if you have any questions regarding your endoscope and suitable accessories for it.

- Please check that your endoscope is designed for/compatible with the desired peripheral equipment. Important relevant information can be found on your endoscope's or processor's identification plate.
- When choosing new instruments, please be sure to note the diameter of the working channel (see identification plate) and the available working length of your endoscope.
- All PENTAX peripheral equipment in this catalogue has been tested in conjunction with PENTAX endoscopes for functionality and compatibility.
